

平行四辺形 ABCD の面積を S とする

$$S \times \frac{1}{2} \times \frac{1 \times 1}{2 \times 2} = \frac{1}{8} S$$

$$S \times \frac{1}{2} \times \frac{1}{3} = \frac{1}{6} S$$

$$\therefore \frac{1}{6} S \div \frac{1}{8} S = \frac{4}{3} \text{ 倍}$$
