#### 公式 11

### 円と接線と円周角、中心角の関係

$$\angle d = 90^{\circ} - \frac{1}{2} \angle a$$
$$\angle b = 90^{\circ} + \frac{1}{2} \angle a$$

$$\angle c = 2 \angle d$$

### 四角形の内角の和の関係より、

$$\angle a + \angle c = 180^{\circ}...$$

## 円周角の定理より、

$$\angle c = 2 \angle d ... 2$$

$$\angle b = 180^{\circ} - \frac{1}{2} \angle c... \ensuremath{\ensuremath{\Im}}$$

$$\angle c = 180^{\circ} - \angle a$$

$$2\angle d = 180^{\circ} - \angle a$$

### よって、

$$\angle d = 90^{\circ} - \frac{1}{2} \angle a... \textcircled{4}$$

$$\angle b + \angle d = 180^{\circ}...$$

$$\angle b + 90^{\circ} - \frac{1}{2} \angle a = 180^{\circ}$$

# 整理して、

$$\angle b = 90^{\circ} + \frac{1}{2} \angle a$$
